# Job description

Carrington Mortgage Services, LLC - Developer, CRM, II

Job URL

## Developer, CRM, II

Carrington Mortgage Services, part of The Carrington Companies, provides integrated mortgage loan servicing assistance and customer care supporting borrowers and investors. The CRM Developer II will administer, configure, develop, integrate, and support the company's Zendesk customer support platform while collaborating with business partners, IT peers, and the PMO. The role also supports workflow improvements, reporting, security administration, troubleshooting, documentation, and end-user training.

### Responsibilities

Serve as a CRM technical contributor and administrator for Carrington's Zendesk customer support platform (Support, Guide, Chat/Messaging, Talk, and Explore)

Provide Zendesk technical guidance to business partners, end users, and the Project Management Office (PMO) on assigned initiatives

Participate in business planning sessions addressing Zendesk enhancements, integrations, and day-to-day operational issues

Work with business management and the PMO on the planning of new Zendesk configurations and changes to existing workflows

Assist with system design activities and business/system impact analysis for initiatives that introduce, modify, or upgrade Zendesk applications

Provide technical support in the development and implementation of Zendesk integration efforts with other enterprise applications, using Zendesk APIs and webhooks

Support workflow analysis and process improvement activities that affect Zendesk applications

Design, configure, test, and deploy changes to Zendesk fields, forms, triggers, automations, macros, views, and dashboards

Help maintain Zendesk configuration to align with corporate strategy and business unit needs

Develop custom Zendesk (Explore) reports and dashboards requested by the business lines

Follow Carrington's SDLC practices, methodologies, and change control policy in the development and rollout of Zendesk changes

Assist with administering Zendesk security roles, groups, and user permissions across assigned business lines

Provide system administration support for Zendesk applications, including researching and troubleshooting issues, replicating problems in the test/sandbox environment, and coordinating fixes and upgrades

May develop end-user documentation, including application job aids and workflow guides

May assist in training end users on new Zendesk features and changes to system functionality

Perform other special projects and duties as assigned or requested
