Growth Opportunities

H1B Sponsor Likely

Responsibilities

Deliver hands-on client project work as an individual contributor, staying current with Agentforce and Salesforce delivery practices

Lead and own complete project technical solution design, including designing and understanding agentic topics, instructions, actions with corresponding automation/code, agent deployment methods, and supporting data structures

Explore the limits and push the boundaries of automated agents, finding novel solutions to drive business outcomes

Manage a team of Experience Architects, Technical Architects, Consultants, Developers, and/or similar technical delivery roles

Provide mentorship, career guidance, and regular performance feedback, including corrective action when necessary

Own forecasting and staffing input for your team, in partnership with delivery and operations leadership

Coordinate and lead solution design reviews to maintain quality and consistency across client engagements

Author content for, and help facilitate, enablement workshops and office hours

Participate in and help lead skill-based guilds that foster knowledge sharing

Support hiring by conducting interviews and helping update interview materials

Champion NeuraFlash delivery standards and best practices across your team and accounts

Travel up to 25% for customer projects and company events

AgentforceGenerative AISalesforceTechnical Solution DesignPrompt EngineeringAI OrchestrationEnterprise AI IntegrationsRetrieval-Augmented Generation (RAG) ArchitectureLLM Fine-TuningProject DeliveryTechnical Team Staffing and ForecastingTechnical InterviewingPeople Management

Required

5+ years of hands-on experience delivering technology solutions, including experience with Agentforce or other generative AI-driven platforms

2+ years of experience managing or mentoring delivery team members such as architects, developers, and consultants

Demonstrated ability to balance billable client delivery work with team leadership responsibilities

Experience giving performance feedback, holding career development conversations, and managing corrective action processes

Experience participating in hiring for technical roles, including conducting interviews

Strong communication skills, comfortable moving between technical delivery conversations and people-management conversations

Preferred

Experience designing or facilitating enablement content (workshops, office hours, guilds)

Certifications relevant to architect-level roles

Experience forecasting and managing staffing/resourcing for a technical team

Prior experience specifically delivering Agentforce projects

Familiarity with multiple foundational LLMs, prompt engineering frameworks, and AI orchestration tools

Understanding of enterprise AI integrations, RAG architecture, and fine-tuning strategies

Benefits

Remote work opportunities, including working remotely or from the Massachusetts headquarters or regional hubs

Flexibility to attend to personal responsibilities during the workday, with a culture focused on results rather than fixed hours

Town halls and company meetings where employees can provide suggestions and feedback to the executive team

Team celebrations and social activities, including arm wrestling contests, costume parties, and ugly holiday sweater events
