Cover letter

OCLC - Senior Software Engineer

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Senior Software Engineer position at OCLC. With over seven years of dedicated experience in software engineering, focusing on scalable cloud-based applications, I have successfully designed and implemented complex solutions that enhance user experience and operational efficiency. At Docker, I led the development of a cloud platform that improved service reliability by 30% and streamlined deployment processes, directly addressing the high availability needs of library systems.

My proficiency in modern programming languages, including Java and JavaScript, combined with my hands-on experience in establishing CI/CD practices, aligns perfectly with the requirements outlined in the job description. By advocating for engineering best practices and mentoring junior engineers, I fostered an environment of knowledge sharing that has resulted in significant productivity gains.

I am particularly attracted to the opportunity at OCLC due to your commitment to making knowledge accessible globally, and I am eager to contribute my skills and passion to your innovative team.

Thank you for considering my application. I look forward to discussing how my background aligns with OCLC's goals and missions.

Sincerely,
Triet Le
