Job description

Thomson Reuters - Senior Software Engineer I

Job URL

Senior Software Engineer I

Thomson Reuters provides trusted content and technology solutions for professionals and organizations across industries. The Senior Software Engineer I will help build and evolve a document-processing platform that supports AI products, designing client-facing REST APIs, developing scalable cloud services using AI/ML and LLM technologies, and contributing to technical decisions. The role also involves cross-functional collaboration, technical leadership, and mentoring junior engineers.

Responsibilities

Contribute to technical decision-making, influencing product direction, cloud infrastructure, and application architecture

Design and ship client-facing REST APIs — defining contracts up front, with developer experience and consumer ergonomics treated as first-class concerns

Build scalable cloud services that process millions of documents per month, using AI/ML technologies including LLMs

Collaborate cross-functionally with engineers, product managers, scientists, and legal experts

Mentor more junior engineers and contribute to the team's engineering culture

Qualification

Cloud-Native Application HostingREST API DesignOpenAPI/SwaggerC#/.NETSQLAngularDockerKubernetesGitHub ActionsGitAI-Assisted Development Tools

Required

* Bachelor's degree in computer science, software engineering, or a related field; or equivalent practical experience

* 4+ years of software development experience, with a strong focus on cloud-native application hosting and maintenance (preferably on Azure; AWS or GCP also valuable)

* Experience designing and building clean, well-documented client-facing REST APIs using an API-first approach — defining contracts (e.g., OpenAPI / Swagger) before implementation, with developer experience and consumer ergonomics treated as first-class concerns

* Strong proficiency in C# / .NET and SQL, with working knowledge of Angular

* Hands-on experience with containerization (Docker, Kubernetes), CI/CD pipelines (GitHub Actions), and

version control (Git)

* Comprehensive understanding of the entire software development lifecycle, including agile methodologies, testing, monitoring, and incident management

* Experience providing technical leadership within a development team, including but not limited to: mentoring junior developers, reviewing code, training on new technologies / concepts, and providing input on technical decisions

* Exceptional communication skills, both written and verbal, with the ability to:

+ Build and maintain strong relationships with stakeholders

+ Contribute positively to long-term team dynamics and health

* Demonstrated ability to solve complex technical problems creatively and effectively

* Adaptability and eagerness to learn new technologies and methodologies in a rapidly evolving field

* Hands-on experience with **AI-assisted development tools** (e.g. Claude Code, Cursor, GitHub Copilot)

* Willingness to participate in the team's on-call rotation

Preferred

* Familiarity with other strongly typed languages (e.g. C++, Java, Go — Rust experience is particularly welcome) is a plus, as is experience with AWS or GCP

* Experience with AI/ML technologies — especially MLOps (model hosting and deployment), large-volume document processing, NLP, and/or LLM-based applications (RAG, agentic workflows, prompt engineering) — is highly desirable

* Familiarity with the legal industry is a plus; experience in legal tech is particularly welcome

Benefits

Flexible hybrid working environment for office-based roles

Work from anywhere for up to 8 weeks per year

Flex My Way supportive workplace policies for managing personal and professional responsibilities

Continuous learning and skill development through Grow My Way programming and a skills-first approach

Flexible vacation

Two company-wide Mental Health Days off

Access to the Headspace app

Retirement savings

Tuition reimbursement

Employee incentive programs

Resources for mental, physical, and financial wellbeing

Two paid volunteer days off annually

Opportunities to get involved with pro-bono consulting projects and Environmental, Social, and Governance (ESG) initiatives

Market competitive health, dental, vision, disability, and life insurance programs

Competitive 401k plan with company match

Competitive vacation, sick and safe paid time off

Paid holidays, including two company mental health days off

Parental leave

Sabbatical leave

Optional hospital, accident and sickness insurance paid 100% by the employee

Optional life and AD&D insurance paid 100% by the employee

Flexible Spending and Health Savings Accounts

Fitness reimbursement

Access to Employee Assistance Program

Group Legal Identity Theft Protection benefit paid 100% by employee

Access to 529 Plan

Commuter benefits

Adoption & Surrogacy Assistance

Access to Employee Stock Purchase Plan

Annual Bonus based on a combination of enterprise and individual performance
