Responsibilities

Administer and maintain Salesforce and CPQ, including user access, profiles, security settings, workflows, dashboards, reports, and system configurations

Serve as the primary business resource for Salesforce, CPQ and other commercial applications

Troubleshoot system issues, resolve user inquiries, and coordinate enhancements with IT and external partners

Support system upgrades, testing, validation, and implementation activities

Ensure commercial systems effectively support evolving business processes and organizational needs

Develop, maintain, and enhance Power BI dashboards, scorecards, and performance reporting tools

Analyze sales performance, pipeline health, forecasting accuracy, customer trends, territory performance, and key commercial metrics

Identify business trends, risks, opportunities, and performance drivers through data analysis

Translate complex data into clear, actionable insights and recommendations for business leaders

Create and deliver executive-ready reports, presentations, and business reviews that support strategic and operational decision-making

Support monthly, quarterly, and annual business performance reviews

Support forecasting, pipeline management, territory planning, account management, and performance tracking processes

Partner with commercial leaders to evaluate business performance and identify opportunities for improvement

Recommend process enhancements that improve sales productivity, reporting accuracy, and operational efficiency

Support implementation of commercial best practices and standardized operating processes

Assist with compensation reporting, sales planning activities, and commercial operations initiatives as needed

Maintain integrity and accuracy of customer, account, opportunity, product, and sales data

Execute data cleansing, validation, de-duplication, and governance activities

Establish and maintain reporting standards, KPI definitions, and data quality controls

Ensure compliance with commercial data governance and business requirements

Support data alignment across Salesforce, Power BI, SAP S/4HANA, and other commercial systems

Partner closely with Sales, Commercial Operations, Finance, Customer Service, Marketing, and IT

Gather business requirements and translate them into scalable system, reporting, and process solutions

Develop and maintain user documentation, training resources, and process guides

Train and support end users to drive adoption and effective utilization of commercial systems

Act as a liaison between business stakeholders and technical teams to ensure successful execution of commercial initiatives
