Cover letter

Bloomerang - Salesforce Administrator

Job URL

Dear Hiring Manager,

As a Senior Salesforce Administrator and Developer with over 7 years of experience, I am excited to apply for the Salesforce Administrator position at Bloomerang. I understand your mission-driven technology environment requires a skilled professional to manage Salesforce configurations, enhance security controls, and support integrated applications aimed at increasing nonprofit impact.

In my current and recent roles at Docker and AWS, I have led the administration of complex Salesforce environments managing profiles, permission sets, and custom metadata types while designing scalable flows and automation to improve operational efficiency. I successfully implemented AI-driven case triage solutions using Agentforce which boosted case routing accuracy by 20%, and engineered security models that cut access-related support requests by 15%. My proactive adoption of Salesforce releases and AI productivity tools ensures continuous platform improvement aligned with organizational goals.

Working extensively within Sales Cloud and Service Cloud and thriving in Agile teams, I bring a collaborative approach to gathering requirements, documentation, and delivery velocity. My technical skillset aligns naturally with Bloomerang’s needs for robust, secure Salesforce administration combined with a commitment to improving nonprofit CRM impacts.

Thank you for considering my application. I look forward to contributing to Bloomerang’s impactful technology solutions.

Sincerely,
Triet Le
