Cover letter

CGI Digital - Senior Salesforce Developer

Job URL

Dear Hiring Manager,

I am writing to express my strong interest in the Senior Salesforce Developer role at CGI Digital. With over seven years of extensive hands-on experience developing and maintaining scalable Salesforce solutions across multiple industries, I bring proven expertise directly aligned with your engineering needs. I have successfully led full-stack Salesforce development projects, delivering robust Apex classes, Lightning Web Components, asynchronous batch processing, and secure, maintainable API integrations leveraging REST and SOAP protocols.

At Docker, I engineered batch Apex processes to efficiently handle 250,000+ records monthly, reducing automation failures by 20%, and implemented modern flow architectures that improved automation maintainability. At AWS, I developed Experience Cloud portals and integrations that increased qualified meeting bookings by nearly 10% while reducing customer support emails by 20%. These accomplishments demonstrate my ability to deliver reliable, scalable, and high-performance Salesforce solutions that meet evolving business requirements.

My strong understanding of Salesforce platform best practices, governor limits, security models, and Agile delivery methodologies ensures that I can quickly contribute within a collaborative team while independently driving complex development work. I am excited about applying my skills to enhance CGI Digital’s Salesforce platform and support your team’s success.

Thank you for considering my application.

Sincerely,
Triet Le
