Job description

Clark Nuber PS - Salesforce Platform Builder and Developer, Senior Consultant (Remote: WA, AR, CA, ID, OR, TX)

Job URL

Salesforce Platform Builder and Developer, Senior Consultant (Remote: WA, AR, CA, ID, OR, TX)

Clark Nuber is seeking a Salesforce Platform Builder and Developer, Senior Consultant to lead Salesforce implementations for clients. The role oversees discovery, solution design, configuration, development, integrations, data migration, deployment, client support, and technical leadership across diverse projects.

Accounting

Growth Opportunities

Responsibilities

Lead technical delivery for Salesforce client engagements by overseeing implementation planning, risk assessment, configuration, development, integrations, data migration activities, staff assignments, and project execution while keeping engagement leaders informed of progress, risks, scope changes, and budget status

Serve as the technical lead for assigned Salesforce projects, coordinating technical workstreams and collaborating with project managers, implementation leads, and cross-functional team members to achieve project objectives

Design, configure, develop, test, deploy, and maintain Salesforce solutions using declarative and programmatic tools, including Flows, security controls, reports, dashboards, Lightning Web Components, automation, and custom enhancements

Participate in client discovery, solution design, and technical planning activities by analyzing business requirements, evaluating system needs, and recommending scalable solutions aligned with approved project scope and client objectives

Lead integration and data migration efforts involving Salesforce, Sage Intacct, DataBlend, and other connected systems, including configuration, testing, troubleshooting, validation, and deployment activities

Diagnose and resolve complex technical issues related to Salesforce, integrations, metadata, deployments, reporting, and data quality, while coordinating with software vendors and technical support resources as needed

Manage application lifecycle and release processes using Salesforce DX, Visual Studio Code, Git-based source control, code reviews, deployment planning, environment management, and established development standards

Support data architecture and reporting strategy efforts including data modeling, object design, relationship management, security architecture, reporting requirements, and configuration decisions

Create and maintain project documentation including configuration records, testing results, deployment documentation, integration specifications, technical deliverables, reusable solutions, and lessons learned

Provide client support, training, and relationship management by delivering technical training, supporting ongoing customer care activities, facilitating communications, and promoting successful solution adoption

Provide technical leadership and mentorship to consultants and project team members by sharing expertise, supporting professional growth, establishing technical standards, and promoting delivery excellence

Contribute to business growth and continuous improvement initiatives through sales support, solution scoping, technical demonstrations, innovation efforts, process improvements, achievement of client value goals, and

ongoing professional development

Perform other duties as assigned by manager or senior manager to support the needs of the organization
