Cover letter

Clark Nuber PS - Salesforce Platform Builder and Developer, Senior Consultant (Remote: WA, AR, CA, ID, OR, TX)

Job URL

Dear Hiring Manager,

I am excited to apply for the Salesforce Platform Builder and Developer, Senior Consultant position at Clark Nuber. Over the past 7+ years, I have successfully led multiple full lifecycle Salesforce implementations specializing in architecting scalable, secure, and integrated Salesforce solutions that align precisely with business needs.

At Docker and AWS, I led technical delivery for diverse Salesforce projects encompassing custom Lightning Web Components, OmniStudio guided workflows, and complex REST API integrations that supported over 250,000 transaction records monthly and delivered measurable process efficiencies such as a 20% reduction in automation failures and a 15% decrease in support cases related to access issues. My hands-on experience with Salesforce DX, Git-based DevOps, and deployment strategies aligns closely with your requirements for disciplined release management.

Additionally, my expertise in Salesforce Flow Builder and declarative automation, combined with deep knowledge of security and compliance protocols including HIPAA, equips me to design secure yet user-friendly solutions. I have also collaborated extensively on integrating SaaS applications and middleware platforms, including Sage Intacct and agent-assist AI frameworks, to streamline operations and enhance user adoption.

I am confident that my technical leadership and passion for delivering high-quality, scalable Salesforce solutions will allow me to contribute effectively to Clark Nuber's client success. I look forward to the opportunity to discuss how I can help your team meet and exceed its technical and business objectives.

Sincerely,
Triet Le
