Job description

Commence - Senior Salesforce Developer

Job URL

Senior Salesforce Developer

Commence is a healthcare-focused company using data, technology, and clinical expertise to improve care and operational efficiency. The Senior Salesforce Developer will lead the architecture, development, integration, and optimization of a scalable Salesforce ecosystem supporting case and payment-dispute workflows. The role also provides technical leadership, mentorship, stakeholder guidance, and process improvement.

Responsibilities

Define and implement robust architectures for Salesforce solutions, ensuring alignment with enterprise goals and scalability requirements

Evaluate and recommend best practices, tools, and strategies for Salesforce development and integration

Lead the design and implementation of complex, multi-system integrations involving Salesforce and other platforms, particularly AWS

Develop advanced Salesforce solutions using Apex, Visualforce, Lightning components, and Flow to meet complex business needs

Build custom applications and enhancements, focusing on scalability, reliability, and performance optimization

Establish and enforce development standards, including code quality, testing, and deployment practices

Implement seamless integrations between Salesforce and other cloud services, ensuring secure and efficient data exchange

Design and implement data management strategies, including migration, integration, and data cleansing, to maintain platform integrity

Provide mentorship and guidance to junior developers, fostering a culture of continuous learning and improvement

Act as a trusted advisor to stakeholders, translating business needs into technical solutions

Lead technical discussions, resolve complex issues, and drive consensus on architectural decisions

Identify and drive improvements in development processes, tooling, and team collaboration to enhance delivery efficiency

Stay ahead of Salesforce advancements and industry trends to recommend and implement cutting-edge solutions
