Cover letter

Commence - Senior Salesforce Developer

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Senior Salesforce Developer position at Commence. With over seven years of progressive experience architecting and developing Salesforce ecosystems—particularly in healthcare environments—I bring a strong track record of delivering scalable, secure, and high-performance solutions.

At Docker, I led the design of scalable OmniStudio and Apex-based workflows that improved process completion rates by 18% and reduced automation failures by 20%. My passion for integrating Salesforce with cloud platforms, especially AWS, aligns well with your needs for multi-system integration and secure data exchange. At AWS, I enhanced healthcare payer CRM workflows and implemented complex Lightning and Experience Cloud portals, reducing support requests by 20% and increasing qualified meeting bookings by nearly 10%.

I am adept at Salesforce architecture and integration, leveraging REST APIs, event-driven patterns, and Salesforce AI tools such as Agentforce to modernize workflows and improve operational efficiency. My leadership in mentoring developers and driving development standards will support your team’s growth and delivery excellence.

I am confident my technical expertise and healthcare-focused Salesforce experience will help Commence evolve its Salesforce ecosystem, improving case and payment-dispute workflows while aligning with enterprise goals.

Thank you for considering my application.

Sincerely,
Triet Le
