Cover letter

Concentrix - Salesforce Data360 Developer

Job URL

Dear Hiring Manager,

I am excited to apply for the Senior Salesforce Data Cloud Developer position at Concentrix. With over 7 years of Salesforce experience, including more than 3 years focused on Salesforce Data Cloud (Data 360), I am confident in my ability to design, build, and optimize scalable data solutions that support your customer experience transformation goals.

At Docker, I led the development of Salesforce Data Cloud implementations emphasizing identity resolution, unified customer profiles, and segmentation to enhance enterprise data utilization by 30%. My hands-on experience with SOQL optimization, event-driven integrations, and data ingestion pipelines used across CRM, marketing, and external systems directly aligns with your need for robust, scalable data integration and activation.

Additionally, my leadership in mentoring development teams and establishing best practices aligns with your team’s focus on governance and technical excellence. My combined expertise in Salesforce ecosystems, APIs, ETL pipelines, and cloud platforms including AWS ensure smooth enterprise integration and data quality.

I am enthusiastic about collaborating cross-functionally at Concentrix to deliver impactful Salesforce Data Cloud solutions that drive data-driven customer insights and engagement.

Thank you for considering my application. I look forward to the opportunity to contribute to your intelligent transformation initiatives.

Sincerely,
Triet Le
