Cover letter

Diverse Lynx - Salesforce CPQ Developer

Job URL

Dear Hiring Manager,

I am excited to apply for the Salesforce CPQ Developer role where my 7+ years of Salesforce experience and specialized expertise in CPQ solutions can directly contribute to your Managed Storefront environment. At Docker and AWS, I led CPQ design and development efforts, driving scalable pricing, quoting, and approval automation workflows that improved process efficiency by up to 25% and reduced automation errors by 20%.

My strong proficiency with Apex, SOQL, and Salesforce Flows, combined with extensive experience integrating Salesforce CPQ with external billing and analytics platforms, aligns tightly with your needs for someone who can deliver end-to-end technical ownership and support production stability. I am accustomed to collaborating closely with cross-functional teams to translate business requirements into robust CPQ solutions, while participating proactively in on-call rotations to ensure uninterrupted service.

Moreover, my work introducing AI-enabled case triage with Agentforce demonstrates my commitment to leveraging Salesforce’s latest innovations to optimize support workflows. I am confident that my background in building compliant, maintainable, and scalable Salesforce CPQ architectures in regulated environments transfers naturally to this position, positioning me to quickly deliver value.

Thank you for your consideration. I look forward to discussing how I can support your team’s success.
