Eigenherd GmbH - Salesforce Architect (m/w/d)

Job URL

Dear Hiring Manager,

As a Senior Salesforce Architect with over seven years of deep expertise in Salesforce CRM platforms, I am excited about the opportunity to contribute to Eigenherd GmbH's digital transformation initiatives in the energy sector. My extensive background in architecting scalable and sustainable Salesforce solutions—especially utilizing OmniStudio, Energy & Utilities Cloud, and custom Apex development—directly aligns with your need to translate complex customer requirements into robust, maintainable solutions.

At Docker, I led the design and implementation of OmniStudio solutions that increased customer service efficiency by 25% and reduced automation failures by 20% through governor-limit aware development. Additionally, my leadership in managing user access frameworks lowered support incidents by 15%. While at AWS, I architected multi-cloud Salesforce implementations including AI-driven Agentforce triage capabilities, further demonstrating my ability to integrate emerging technologies within scalable architectures.

My technical consultative skills, combined with hands-on expertise in development, integration, and team leadership, enable me to drive projects from conception through delivery effectively. I am confident my proven experience in Salesforce architecture, especially within regulated industries, and my passion for leveraging innovations will allow me to add immediate value to Eigenherd GmbH.

Thank you for considering my application. I look forward to discussing how I can contribute to your team’s success.

Sincerely,
Triet Le
