Cover letter

Fanatics - Senior Salesforce Engineer (Remote)

Job URL

Dear Hiring Manager,

With over seven years of progressive experience as a Senior Salesforce Engineer, I have developed a deep expertise in designing, building, and maintaining scalable Salesforce solutions that meet complex business needs. At Docker and AWS, I engineered robust Apex and Lightning Web Component solutions, integrating Salesforce with diverse internal and external systems using scalable API and event-driven architectures. One of my key accomplishments includes reducing automation failures by 20% and improving case resolution speed by 15% through optimized Apex and flow automation. I have led security enhancements reducing access-related support requests by 15%, exemplifying my ability to implement secure, maintainable Salesforce environments.

I am well-versed with Salesforce DX, CI/CD pipelines, and applying best practices for deployment and code quality—skills directly relevant to ensuring platform reliability and operational excellence at Fanatics. My experience collaborating cross-functionally with Product, Marketing, and Data teams equips me to translate complex requirements into technical solutions that enhance user experiences and business operations.

My technical proficiency combined with a passion for leveraging AI-powered Salesforce features aligns closely with Fanatics' vision of a next-generation digital sports platform. I am eager to contribute my skills toward building innovative, reliable Salesforce applications that support scalable growth and exceptional customer engagement.

Thank you for considering my application.

Sincerely,

Triet Le
