Cover letter

Flosum - Salesforce Engineering Manager (US)

Job URL

Dear Hiring Manager,

As a Salesforce Technical Architect and Engineering Manager with over 7 years of extensive experience, I am excited about the opportunity to lead your engineering team and enhance the Salesforce Platform at Flosum. My career demonstrates proven expertise in designing scalable and secure Salesforce architectures while managing and mentoring engineers to improve development velocity.

At Docker, I architected and led integrations, Apex development, and OmniStudio solutions that reduced automation failures by 20% and decreased support tickets by 15% through robust security models. At AWS, I spearheaded Experience Cloud enhancements increasing qualified meetings by 10% and streamlined executive forecasting dashboards with a 35% reduction in manual effort. My technical leadership in integrating Salesforce APIs and Node.js based microservices aligns directly with your needs for scalable enterprise application development and cloud best practices.

Moreover, I have a solid track record in growing high-performing teams, balancing roadmap delivery with engineering excellence including CI/CD, code quality, and system performance. My in-depth knowledge of DevOps, cloud infrastructure, security, and scalable architectures equips me to solve the complex engineering challenges you face.

I am eager to bring my combined technical and leadership skills to drive Flosum’s Salesforce platform innovation and team success.

Sincerely,
Triet Le
