Cover letter

GBG Plc - Salesforce Developer (4057)

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Salesforce Developer role at GBG. With over 7 years of focused experience developing scalable Salesforce solutions spanning Sales Cloud, Service Cloud, Experience Cloud, CPQ, and Billing, I am confident in my ability to address GBG's platform challenges.

At Docker and AWS, I owned both declarative and programmatic solutions, balancing pragmatic Flow automation with complex Apex and LWC development tailored to platform constraints and governor limits. My leadership in managing Gearset deployments has ensured disciplined code promotion across distributed environments, aligning with your CoE standards. I have successfully triaged complex platform issues and improved automation reliability by 20%, showcasing my debugging and root-cause analysis skills.

My hands-on exposure to Salesforce CPQ and Billing, combined with early adoption of AI-assisted tools such as Claude and Agentforce, positions me to effectively support your evolving automation and AI-driven delivery goals.

I am excited about the opportunity to contribute my technical expertise along with an ability to produce high-quality documentation and solutions in a distributed team environment to GBG's innovative Salesforce practice.

Thank you for your consideration.

Sincerely,
Triet Le
