Job description

Humana - Senior Salesforce Engineer

Job URL

Senior Salesforce Engineer

Humana is a leading U.S. healthcare company providing insurance and healthcare services. The Senior Salesforce Engineer designs and delivers scalable Salesforce solutions, integrations, automations, and data solutions to address complex business problems. The role partners with stakeholders, makes architectural decisions, troubleshoots technical issues, and improves efficiency, scalability, and user experience across the Salesforce ecosystem.

Responsibilities

The Senior Software Engineer codes software applications based on business requirements

The successful candidate demonstrates strong critical thinking skills, intellectual curiosity, and a relentless drive to deliver results

They take ownership of challenges from discovery through implementation, leveraging Salesforce technologies, integrations, automation, and data solutions to create meaningful business outcomes

This role requires someone who can operate independently, influence technical direction, make sound architectural decisions, and consistently execute in a fast-paced environment without requiring extensive oversight

They are expected to identify opportunities, challenge existing processes, think creatively, and develop innovative solutions that improve efficiency, scalability, and user experience across the Salesforce ecosystem

Rather than simply executing requirements, this engineer actively partners with stakeholders to understand root causes, anticipate future needs, and deliver solutions that create long-term value

Required

Bachelor's Degree in Computer Science or related field

5+ years of hands-on Salesforce development experience, including Apex, Lightning Web Components (LWC), Flows, SOQL, Salesforce APIs, and platform configuration

Experience designing, developing, testing, deploying, and supporting enterprise-scale Salesforce solutions

Strong understanding of Salesforce architecture, security model, data modeling, sharing rules, governor limits, and platform best practices

Experience integrating Salesforce with internal and external systems using REST APIs, SOAP services,

middleware, event-driven architectures, or other integration technologies

Demonstrated ability to troubleshoot complex technical issues, perform root cause analysis, and implement sustainable solutions

Experience working in Agile environments and collaborating with business stakeholders, product owners, administrators, architects, and engineering teams

Strong analytical, critical thinking, and problem-solving skills with the ability to evaluate multiple solution options and make sound technical decisions

Proven ability to translate ambiguous business requirements into scalable, maintainable solutions that deliver measurable business value

Excellent verbal and written communication skills with the ability to explain technical concepts to both technical and non-technical audiences

Preferred

Master's Degree

Benefits

Medical, dental and vision benefits

401(k) retirement savings plan

Time off (including paid time off, company and personal holidays, paid parental and caregiver leave)

Short-term and long-term disability

Life insurance

Associates who live and work from Home in the state of California, Illinois, Montana, or South Dakota will be provided a bi-weekly payment for their internet expense.

Humana will provide Home or Hybrid Home/Office associates with telephone equipment appropriate to meet the business requirements for their position/job.

This job is eligible for a bonus incentive plan. This incentive opportunity is based upon company and/or individual performance.
