Job description

ICF - Salesforce Developer DHS (Remote)

Job URL

Salesforce Developer DHS (Remote)

ICF is a global advisory and technology services provider, and they are seeking an experienced Salesforce Developer to support a Salesforce implementation project for the US Department of Homeland Security (DHS). The role involves designing and developing Salesforce-based solutions, collaborating with stakeholders, and ensuring compliance with federal standards.

ConsultingInformation TechnologyProfessional Services

No H1BSecurity Clearance RequiredU.S. Citizen Only

Responsibilities

Design, develop, and configure Salesforce-based solutions using low-code/no-code tools and custom code (e.g., Apex, Visualforce, Lightning Web Components) to meet DHS requirements

Implement and customize Salesforce Public Sector Solutions and Experience Cloud to support stakeholder needs, including case management, citizen engagement portals, and workflows

Collaborate with Business Analysts and stakeholders to translate requirements into technical solutions, including user stories, workflows, and system features

Develop and maintain integrations with external systems, ensuring secure data exchange and compliance with federal standards

Support data migration from legacy systems, including data mapping, transformation, and validation to ensure accuracy and integrity

Write clean, efficient, and well-documented code adhering to Salesforce best practices and federal security requirements (e.g., NIST, FISMA)

Assist in creating technical documentation for project deliverables, gate reviews, and ATO cybersecurity requirements

Troubleshoot and resolve technical issues, optimizing system performance and scalability for long-term support

Support user training by providing technical insights and ensuring system features are user-friendly and adoptable
