Cover letter

ICF - Salesforce Developer DHS (Remote)

Job URL

Dear Hiring Manager,

I am an accomplished Senior Salesforce Developer with over seven years of experience architecting and delivering secure, compliant Salesforce solutions aligned with federal cybersecurity standards such as NIST and FISMA. My expertise in Apex, Lightning Web Components, and Salesforce OmniStudio complements my strong background with Public Sector Solutions and Experience Cloud, making me well suited to support the Department of Homeland Security's Salesforce implementation objectives.

At Docker and AWS, I designed and deployed scalable Salesforce integrations and automation for high-volume enterprise environments, reducing automation failures by 20% and improving qualified lead bookings by 10%. I have proactively implemented secure access models and data-driven workflows that enhanced security compliance and user experience, directly addressing challenges encountered in federal environments. My hands-on experience with REST and SOAP APIs, middleware integration, and DevOps tools facilitates smooth and secure data exchange critical for DHS's mission.

My proven ability to collaborate effectively with business analysts and stakeholders to translate complex requirements into maintainable Salesforce solutions ensures I can deliver technical excellence with strong governance and adoption focus. I'm confident that my federal experience, technical proficiency, and focus on scalable, compliant design would naturally transfer to the needs of the DHS Salesforce project.

Thank you for considering my application. I look forward to the opportunity to contribute to your team.
