Job description

Lightspeed DMS - Salesforce Administrator

Job URL

Salesforce Administrator

Lightspeed provides cloud-based dealer management software for powersport, marine, RV, trailer, and golf car dealerships. The Salesforce Administrator will design, develop, administer, and maintain Salesforce solutions, integrations, automations, security, and data governance while partnering with cross-functional teams to support scalable business operations.

No H1B

Responsibilities

Design, develop, test, and deploy custom Apex classes, triggers, Lightning Web Components (LWC), and Aura components to meet evolving business needs

Build and maintain scalable automation using Flow Builder, Process Builder, and Workflow Rules, with a preference for declarative solutions where appropriate

Participate in Agile development cycles, contributing to sprint planning, code reviews, and release management

Implement and maintain deployment pipelines using Salesforce DX, GitHub, and CI/CD frameworks such as Copado or Gearset

Maintain a comprehensive test suite (minimum 80% Apex code coverage) and manage sandbox strategy for development, UAT, and staging environments

Oversee daily operations of the Salesforce org, including user setup, profiles, permission sets, role hierarchy, and field-level security

Maintain and enhance page layouts, custom objects, record types, validation rules, and sharing settings to support business function changes

Conduct regular performance audits, security reviews, and data quality checks; enforce data governance and deduplication standards

Stay current with Salesforce releases (3x per year), evaluate new features, and implement relevant updates with appropriate regression testing

Maintain clear, up-to-date documentation of all configurations, customizations, integrations, and architectural decisions

Own and extend Lightspeed’s Salesforce integration architecture, ensuring reliable data flow across connected systems including: NetSuite (ERP & financial data), Certinia (Professional Services Automation), NICE CXOne (Contact Center), DocuSign (Contract execution), Conga Composer (Document generation), Enablix (Sales enablement), Qualtrics (Customer feedback), FormAssembly (Data collection), Avonni (UI/UX components)

Evaluate, install, and configure third-party AppExchange applications to extend Salesforce functionality in alignment with business priorities

Build and maintain REST/SOAP API integrations with internal and external platforms

Partner with Revenue Operations, Customer Success, Finance, and Product teams to gather requirements and deliver solutions that scale with the business

Provide technical guidance and mentorship on Salesforce best practices across teams

Support end-user training and adoption initiatives, creating documentation and enablement materials as needed

Qualification

Required

Minimum 3 years of hands-on Salesforce development and administration experience in a fast- paced SaaS or technology company

Experience with Salesforce CPQ or Revenue Cloud for subscription, quoting, and contract lifecycle management

Active Salesforce certifications: Salesforce Administrator and Salesforce Platform Developer I

Proficiency in Apex, SOQL, Visualforce, and Lightning Web Components (LWC), with strong understanding of governor limits and Salesforce architecture

Experience with Salesforce DX and source-driven development workflows (version control with Git, scratch orgs, unlocked packages)

Demonstrated ability to design and build REST/SOAP API integrations between Salesforce and third-party platforms

Solid understanding of the Salesforce Security Model: profiles, permission sets, field-level security, sharing rules, and OWD

Strong data modeling skills, including custom object design, lookup/master-detail relationships, and schema planning

Experience with CI/CD tools for Salesforce deployments (e.g., Copado, Gearset, or GitHub Actions with SFDX)

Excellent problem-solving, prioritization, and project management skills in a dynamic environment

Strong communication and collaboration skills; comfortable working cross-functionally with both technical and non-technical stakeholders

Applicants must be authorized to work in the U.S

Preferred

Additional certifications: Salesforce Platform Developer II, JavaScript Developer I, or Data Architect

Familiarity with the dealer, automotive, powersports, marine, or equipment industries

Experience in a B2B SaaS company with recurring revenue models

Hands-on experience with one or more of our key integrated platforms: NetSuite, Certinia, NICE CXOne, DocuSign, Conga Composer

Bachelor's degree in Computer Science, Information Systems, Business Administration, or equivalent practical experience

Benefits

Remote work
