Responsibilities

Collaborate with government partners and other technology leaders to architect and design scalable and high-performing Salesforce solutions that meet current and future business needs

Lead the architectural design of Salesforce implementations, ensuring best practices and technical excellence

Define and enforce governance policies, security best practices, and scalability principles

Ensure seamless integration between Salesforce and enterprise systems via APIs, middleware (e.g., Mulesoft), and event-driven architectures

Provide guidance on Apex, Lightning Web Components (LWC), and Salesforce Flows

Review technical documentation, perform code reviews, and ensure code quality

Define best practices and standards for Salesforce development, integration, and deployment processes

Implement automation strategies, including CI/CD pipelines, DevOps practices, and testing frameworks for Salesforce applications

Work in an agile manner to efficiently ship new features that meet user needs

Participate in an on-call rotation to support production systems and investigate issues when they occur

Take part in hiring activities (e.g., submitting referrals, conducting interviews, and attending interview debriefs), as neededCoach and mentor junior team members

Required

10+ years of experience designing and implementing scalable, high-performing Salesforce solutions

Strong understanding of Apex, Lightning Web Components (LWC), and Salesforce Flows

Proficiency in integrating Salesforce with enterprise systems via REST/SOAP APIs, Mulesoft, ETL tools, or event-driven architecture

Experience with CI/CD tools such as Gearset, Copado, Jenkins, GitHub Actions, or Salesforce DX

Experience with one or more programming languages/frameworks outside of Salesforce (e.g., .NET, Python, Ruby on Rails)

Experience in cloud-based infrastructure (AWS, Azure, or GCP)

Strong understanding of user interface design best practices for Salesforce applications

Demonstrated ability to think strategically around trade-offs and short-term vs. long-term benefits

Ability to define and enforce governance policies, security best practices, and scalability principles

Excellent written and verbal communication skills, technical and otherwise

Highly resourceful, reliable, and detail-oriented

Tenacity to dive into problems and iterate in working code

An adaptive, empathetic, collaborative, and positive mindset

Legal authorization to work in the United States

Ability to meet any other requirements for government contracts for which candidates are hired

Work authorization that doesn't require visa sponsorship, now or in the future

Preferred

Experience managing a team of engineers and leading by example

Benefits

Comprehensive medical, dental, and vision plans to support your overall health needs

Disability, life, and accidental death insurance at no cost

Vacation, holidays (including Juneteenth), and floating holidays

12 paid federal holidays each year on top of your regular PTO

Eligible employees receive a performance-based annual bonus when Nava meets its goals

Paid time off for new parents, plus weekly meals delivered to your home

Full wellness platform offering physical, mental, and emotional health resources and support tools

Doctors online with no copay through a virtual visit program, depending on available providers

Earn extended unpaid leave after continuous service for personal growth or rest

Nava matches 4% of your salary to support your retirement savings plan

Remote-first environment with flexibility built around your schedule and responsibilities

Company laptop and setup assistance provided via Staples for remote work needs

Monthly reimbursement to help offset eligible home office utility expenses

Internal training programs and resources to help grow your professional skills

LinkedIn Learning access and an annual allowance for courses, tuition, and certifications

Referral bonus when you refer great people who join the Nava team

Pre-tax commuter programs to support in-office travel when applicable

A collaborative and remote-friendly team environment where people genuinely care
