Cover letter

Nava - Senior Software Engineer (Salesforce)

Job URL

Dear Hiring Manager,

With over 7 years of progressive experience designing and implementing scalable Salesforce solutions, I am excited to apply for the Senior Salesforce Engineer position at Nava. My expertise in Apex, Lightning Web Components, Salesforce Flows, and Salesforce OmniStudio aligns closely with your need for building high-performing Salesforce architectures that meet evolving government and business needs.

At Docker and AWS, I led integrations utilizing REST APIs and event-driven architectures including Platform Events and MuleSoft, enhancing data synchronization and platform scalability by over 20%. I have architected governance and security models enforcing least-privilege access and compliance with HIPAA and security best practices, reducing access-related incidents by 15%. My strong background in Salesforce DevOps and CI/CD with Gearset and Salesforce DX enables me to deliver reliable, efficient deployments critical for today's fast-paced Agile environments.

My experience naturally transfers to Nava's mission of modernizing government agency technology. I am eager to bring my strategic thinking and leadership to design future-proof Salesforce solutions while mentoring teams and advancing DevOps practices. I look forward to discussing how my skills and accomplishments can help drive Nava's digital transformation goals.

Sincerely,
Triet Le
