Orion Global Solutions - Salesforce Data Architect

Job URL

Dear Hiring Manager,

I am excited to apply for the Salesforce Data Architect role at Orion Global Solutions. With over 7 years of Salesforce experience, including more than 3 years focused on data architecture and governance, I have designed and optimized scalable Salesforce data models across Sales, Service, Financial Services, and Healthcare Clouds.

At Docker, I led enterprise data migrations and governance initiatives, improving data accuracy by 20% and reducing access-related support by 15% through robust secure access models. My hands-on experience with Salesforce REST and SOAP APIs, MuleSoft integrations, and asynchronous processing has enabled high-volume, enterprise-level data synchronization handling 250,000+ records monthly with increased system reliability.

I also have a strong background in establishing data quality frameworks and aligning security models to meet HIPAA and GDPR compliance, directly relevant to the data governance challenges outlined in your job description. Additionally, I have contributed to Salesforce AI-readiness initiatives, preparing CRM ecosystems for advanced analytics and Agentforce implementation.

My comprehensive expertise with Salesforce architecture, security, data migration, and modern integration patterns naturally aligns with Orion’s focus on innovative, enterprise-grade Salesforce data solutions. I am eager to bring my strategic vision and technical skills to your team, driving impactful CRM data initiatives that support business growth and regulatory compliance.

Thank you for considering my application.

Sincerely,
Triet Le
