Job description

Perficient - Salesforce Solution Architect - Sales Cloud

Job URL

Salesforce Solution Architect - Sales Cloud

Perficient is a global AI and technology consultancy with a Salesforce practice focused on digital transformation. The Salesforce Solution Architect will lead architecture and delivery for Sales Cloud projects, advise customers, scope engagements, guide consultants, and translate business needs into scalable Salesforce solutions. The role will also leverage AI tools and Agentforce to enhance client outcomes.

Responsibilities

Provide Salesforce architecture solutions for projects centered on Sales Cloud, with experience in Service Cloud and Experience Cloud. Revenue Cloud / CPQ expertise is a plus

Work with the Sales team to accurately scope projects for new and existing customers. Describe the art of the possible

Build deep relationships with customers, knowing their business better than they do, and leading them as a trusted advisor through the Salesforce ecosystem. When necessary, have the hard conversations

Be the technical lead on the project and design the overall solution. That includes identifying risks and communicating early and often, fully understanding and following delivery methodology, and leading by example to support consultant growth

Be the technology expert in the room. Deploy best practices to create technology with the right data model and architecture. Consciously grow your expertise and fill potential knowledge gaps

Assist consultants in QA'ing User Stories, guiding their work, and ultimately owning the project's success

Collaborate with clients to understand their business needs and translate them into scalable Salesforce solutions across the sales lifecycle -- pipeline management, forecasting, opportunity management, and Einstein for Sales

Leverage AI tools and Agentforce capabilities to enhance client outcomes and drive innovation within the Sales Cloud ecosystem

Salesforce Sales CloudSalesforce Solution ArchitectureSalesforce Service CloudSalesforce Experience CloudRevenue Cloud / CPQSalesforce Sales Cloud Consultant CertificationAgentforceSalesforce ConsultingProject Team Leadership

Required

3+ years of consulting experience within the Salesforce ecosystem

Experience working as part of or leading a project team

Sales Cloud Consultant certification required

Demonstrated ability to leverage AI tools to enhance productivity and support data-informed delivery

Strong written and oral communication skills

Ability to communicate complex topics effectively to both technical and non-technical audiences

Technical depth gets you in the door

Humble— a team player first. You teach as readily as you learn, and you don't need to be the smartest person in the room to add value

Hungry — genuinely curious and self-driven. You take on a new certification or course because you enjoy it, not because it's assigned, and you dig into unfamiliar problems until you've figured them out

Smart — people-smart. You read a room, enjoy talking with customers, and can hold your own in front of a client audience

Excited about AI— you're already using AI tools to work faster and deliver better outcomes, and you want to keep pushing on that. This is where our SF+ practice is headed, so it's a practical, non-negotiable skill, not a nice-to-have

Preferred

Sales Cloud Consultant certification required; Service Cloud Consultant a plus

Experience delivering on the Experience Cloud platform a plus

Revenue Cloud / CPQ experience a plus

Benefits

This role can be located anywhere in the United States.
