Cover letter

Reifenhäuser Software Consulting - Senior Salesforce Developer (m/w/d) / Operations & Incident Management

Job URL

Dear Hiring Manager,

With over 7 years of experience as a Senior Salesforce Developer, I have successfully delivered reliable and scalable Salesforce solutions across Sales, Service, and Marketing Clouds, making me well-suited to address your challenges at Reifenhäuser Software Consulting. I specialize in incident management and root cause analysis, having reduced critical Salesforce incidents by 18% in my current role through proactive monitoring and collaborative problem-solving.

At both Docker and AWS, I led initiatives to optimize Salesforce performance, implement robust deployment pipelines, and enhance platform security—efforts that contributed to significant improvements in deployment success rates and reduced operational incidents. I am proficient with Agentforce and Salesforce AI technologies, aligning well with your focus on digital transformation and innovation.

My technical expertise, combined with strong communication skills in English and experience collaborating with technical and non-technical stakeholders, ensures effective cross-team alignment on deployments and incident resolution. This background positions me to drive sustainable solutions and support your evolving Salesforce ecosystem.

I look forward to the opportunity to contribute to Reifenhäuser’s mission of delivering secure, efficient, and innovative Salesforce operations.

Sincerely,
Triet Le
