Job description

Resource Logistics Inc. - Salesforce CPQ Developer

Job URL

Salesforce CPQ Developer

The confidential company is seeking a Salesforce CPQ Developer to support its Managed Storefront environment. The role focuses on designing, developing, and supporting Salesforce CPQ solutions, including workflows, pricing logic, quoting, approvals, Apex, integrations, and data models, while owning delivery through release and post-release support.

Growth Opportunities

H1B Sponsor Likely

Responsibilities

Design, develop, and support scalable solutions in a Salesforce CPQ environment

Enhance and maintain storefront-related workflows, configuration, pricing logic, quoting flows, approvals, and related business processes

Develop and support Salesforce backend logic including Apex, integrations, and data models required to support CPQ and storefront workflows

Collaborate with product, operations, and QA teams to translate requirements into technical solutions

Take ownership end-to-end: technical design, implementation, testing, release coordination, and post-release support

Troubleshoot production issues, improve system performance, and improve reliability

Participate in the team's on-call rotation to ensure continuous service operation, including outside core collaboration hours on a periodic basis

Follow best practices across code quality, security, documentation, and maintainability
