Cover letter

Resource Logistics Inc. - Salesforce CPQ Developer

Job URL

Dear Hiring Manager,

I am excited to apply for the Salesforce CPQ Developer role where I can leverage my 7+ years of deep Salesforce development experience, particularly in CPQ environments. At Docker, I successfully designed and implemented scalable CPQ pricing logic, quoting flows, and approval processes, improving quote generation efficiency by 25% and reducing error rates by 20%. My expertise with Apex development, Flow automation, and managing complex integrations aligns perfectly with your need for scalable and maintainable CPQ solutions.

My strong background in end-to-end delivery—from technical design to post-release support—and proactive troubleshooting demonstrates my ability to ensure high system reliability and continuous improvements. The Salesforce CPQ and backend automation projects I led at both Docker and AWS showcased proficient use of Apex, SOQL, and Salesforce automation tools to optimize quoting workflows and integration accuracy.

I am confident that my collaborative approach and ownership mindset will help your team maintain and enhance the Managed Storefront environment effectively. Thank you for considering my application.

Sincerely,
Triet Le
