Cover letter

RxCloud - Salesforce Developer(1099)

Job URL

Dear Hiring Manager,

With over 7 years of hands-on experience designing and developing Salesforce CRM solutions, I am excited to bring my deep expertise in Salesforce development and administration to the Certified Salesforce Developer role at RxCloud. I have a proven track record of building secure, scalable, and customer-facing Salesforce applications using Apex, Lightning Web Components, Visualforce, and OmniStudio that align precisely with your requirements.

In my recent role at Docker, I led the development of guided workflows and integrations managing over 250,000 records monthly, achieving a 20% decrease in automation failures and enhancing data accuracy. At AWS, I architected Experience Cloud portals that reduced support call volume by 20% and implemented lead routing automations that improved qualified meeting conversion rates by nearly 10%. My strong command of Salesforce security, API integrations, and Agile project practices ensures smooth deployment and ongoing platform stability.

My background in healthcare CRM with HIPAA-compliant configurations, combined with advanced development skills, makes me well-prepared to solve complex software challenges and deliver tailored solutions that enhance user engagement and business outcomes for RxCloud.

Thank you for considering my application. I look forward to the opportunity to contribute and grow with your team.

Sincerely,

Triet Le
