Cover letter

Technatomy Corporation - Salesforce Architect

Job URL

Dear Hiring Manager,

I am excited to apply for the Salesforce Architect position at Technatomy Corporation. With over 7 years of progressive experience designing and developing enterprise-grade Salesforce solutions, I bring deep expertise in Salesforce Apex, Lightning Web Components, OmniStudio, and complex integrations aligned with federal and healthcare compliance standards.

At Docker and AWS, I architected scalable Salesforce platforms supporting Sales, Service, and Experience Clouds while leading API-driven integrations that process hundreds of thousands of transactions monthly. I've improved automation reliability by 20% through robust asynchronous Apex patterns and enhanced security models reducing access-related support tickets by 15%. My hands-on experience mentoring teams and driving Agile best practices ensures high-quality delivery and continuous platform improvement.

Having supported healthcare payer solutions governed by HIPAA and participated in architecture reviews ensuring adherence to best practices and security compliance, I am well-prepared to contribute to the Department of Veterans Affairs initiatives. My proven skills on Salesforce architecture, integration design, and compliance will naturally enable me to deliver secure, maintainable, and extensible solutions for your organization.

Thank you for your time and consideration. I look forward to discussing how my experience and technical expertise align with your needs.

Sincerely,
Triet Le
