Cover letter

The RealReal - Staff Salesforce Engineer

Job URL

Dear Hiring Manager,

As a Staff Salesforce Engineer with over 7 years of experience delivering scalable, secure, and innovative Salesforce CRM solutions, I am excited about the opportunity to contribute to The RealReal's vision. My deep expertise in Apex development, Lightning Web Components, and OmniStudio aligns perfectly with your requirement for enhancing marketing tools and AI-driven automation.

At Docker and AWS, I led critical projects involving Agentforce AI integration, reducing manual case routing and improving customer service efficiency by up to 18%. I have developed scalable integrations leveraging REST APIs, Named Credentials, and OAuth, essential for connecting Salesforce with external SaaS and enterprise platforms. My strong architectural background ensures code quality and compliance with governance and security standards across complex, multi-org environments.

My experience advising teams through design discussions and code reviews will support The RealReal's commitment to maintainability and global best practices. I am confident that my Salesforce certifications including Platform Developer II and Application Architect, combined with a proven record of driving innovative automation and integrations in agile settings, will make me a valuable asset to your engineering team.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can help accelerate your Salesforce capabilities.

Sincerely,
Triet Le
