Cover letter

Thrivent - Sr Engineer (S)

Job URL

Dear Hiring Manager,

With over 7 years of specialized experience as a Senior Salesforce Engineer, I offer a strong track record designing, developing, and maintaining scalable Salesforce Sales Cloud and Service Cloud solutions aligned with enterprise business goals. At Docker and AWS, I architected complex Apex and Lightning Web Component solutions processing over 250,000 records monthly, achieving a 20% reduction in automation failures and a 10-20% improvement in operational efficiency through automation and integration enhancements.

My expertise includes deep proficiency in Salesforce integration technologies using REST, SOAP, Platform Events, and Change Data Capture, complemented by solid competence with Java, Spring Boot, and containerized environments like Docker and OpenShift. I have successfully implemented scalable, secure, and maintainable technical solutions supporting healthcare payer and enterprise financial services with rigorous compliance to security and governance standards.

I am adept at delivering robust CI/CD pipelines using Salesforce CLI, Git, and GitHub Actions, enabling rapid and reliable deployments within Agile teams. My experience mentoring junior engineers and collaborating with cross-functional stakeholders naturally supports Thrivent’s goal of building and continuously improving a resilient Salesforce platform.

I am excited about the opportunity to contribute my technical skills and proven problem-solving abilities to Thrivent’s Core Client - CRM team to deliver high-quality, scalable Salesforce solutions that enhance customer engagement and operational excellence.

Thank you for your consideration.

Sincerely,
Triet Le
