Cover letter

UKG - Lead Salesforce Developer

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Lead Salesforce Developer position at UKG. With over 7 years of experience leading Salesforce development initiatives, I bring deep expertise in Apex, Lightning Web Components (LWC), Salesforce Flow, and extensive hands-on experience customizing Salesforce CPQ and Revenue Cloud to accelerate quote-to-cash processes.

In my current role at Docker, I lead complex development efforts, delivering scalable LWC solutions and orchestrating API integrations with various SaaS platforms, which has improved data synchronization accuracy by 30%. Furthermore, I established CI/CD pipelines with Gearset, reducing deployment errors and downtime to zero during major releases. My leadership in mentoring junior developers and conducting code reviews has cut post-release defects by 40%, testament to my focus on quality and collaboration.

UKG's focus on delivering high-performance, scalable Salesforce solutions aligns naturally with my background. I have also integrated Salesforce with Informatica ETL systems, ensuring seamless data synchronization – a central challenge you seek to address. I am excited by the opportunity to drive innovative Salesforce platform enhancements and help your team deliver exceptional user experiences.

Thank you for considering my application. I look forward to the possibility of contributing to UKG's continued success.

Sincerely,
Triet Le
