No H1B

Responsibilities

Manage users, licenses, permission sets, sharing settings, and access controls in coordination with IT

Maintain standard and custom objects, fields, page layouts, record types, validation rules, and Lightning record pages

Build, maintain, and troubleshoot Salesforce Flows to streamline business processes and reduce manual work

Resolve support requests, troubleshoot issues, and coordinate with vendors or technical teams when needed

Maintain data quality through duplicate prevention, validation, cleanup, and controlled imports and exports

Create and maintain reports and dashboards that provide visibility into pipeline, sales performance, and other business metrics

Gather requirements, recommend solutions, and manage a prioritized backlog of enhancements

Test changes in sandbox environments, coordinate user acceptance testing, and deploy approved updates

Review Salesforce releases, assess their impact, and communicate relevant changes to users

Monitor connected applications and coordinate troubleshooting with integration owners and IT

Develop user guides, document configurations, and provide onboarding and ongoing training

Follow company policies for access, data protection, documentation, and system changes
