# Cover letter

Voyager Technologies - Salesforce Administrator

Job URL

Dear Hiring Manager,

With over seven years of progressive Salesforce administration and development experience, I offer a strong blend of technical expertise and hands-on skills directly aligned with Voyager Technologies' need for a Salesforce Administrator. I have a proven record of managing complex user access models, designing efficient flows, and ensuring data quality to support robust CRM operations—in environments requiring precision, security, and cross-team collaboration.

At Docker and AWS, I administered permissions, built automation with Salesforce Flows, and developed dashboards that increased operational visibility by up to 25%, directly improving sales and service outcomes. I effectively reduced manual processing burden by 20% through streamlined automation and led user training initiatives to encourage adoption and minimize support requests. My deep understanding of Sales Cloud configuration, security best practices, sandbox management, and data integrity aligns naturally with your requirements for maintaining and improving the Salesforce environment.

I am confident that my Salesforce Administrator certification, combined with my technical skills and experience working in regulated and enterprise environments, will enable me to make an immediate impact supporting Voyager’s mission-critical CRM solutions. I look forward to the opportunity to discuss how my background can contribute to your team’s success.

Thank you for your consideration.

Sincerely,
Triet Le
