Job description

Wasabi Technologies - Senior Business Systems Engineer (Salesforce & Billing Platform)

Job URL

Senior Business Systems Engineer (Salesforce & Billing Platform)

Wasabi Technologies is a fast-growing cloud storage company developing disruptive, affordable, and high-performance storage solutions. The Senior Business Systems Engineer will advance AI adoption across Business Systems while designing and maintaining Salesforce solutions, modernizing CI/CD, and supporting billing and Quote-to-Cash workflows. The role involves hands-on engineering and collaboration with product, finance, architecture, QA, and support teams.

Growth Opportunities

H1B Sponsor Likely

Unicorn with $1.8B valuation

Responsibilities

Promote AI-driven automation across the platform by actively exploring, piloting, and implementing solutions such as Einstein, Agentforce, and LLM-assisted development workflows

Design, build, and maintain scalable Salesforce solutions using Apex, Flow, Lightning Web Components (LWC), and declarative tools while following development standards

Contribute to CI/CD modernization efforts, including AI-assisted code reviews and test automation

Support and improve billing and Quote-to-Cash workflows as part of the broader platform, working closely with product and finance teams as needed

Work closely with product managers, architects, QA, and other Business Systems Engineers during sprint execution, technical design, and code reviews

Ensure solution quality through unit testing and automated test coverage. Partner with Production Support on root cause analysis when issues arise

Identify technical debt and performance issues, and drive continuous improvement with a focus on automation and AI

Share knowledge through documentation and peer collaboration, while providing informal guidance to junior Business Systems Engineers

Support a culture of ownership, accountability, and continuous improvement

Salesforce DevelopmentApexSalesforce FlowLightning Web Components (LWC)Salesforce Declarative AutomationAI-Assisted DevelopmentAgentforceEinsteinLLM-Assisted CodingCI/CDQuote-to-Cash ProcessesSubscription-Based Revenue ModelsBilling PlatformsPythonSalesforce Platform Developer Certifications

Required

Bachelor's degree in Computer Science, Engineering, or a related field, or equivalent experience

5+ years of hands-on Salesforce development experience

Strong proficiency with Apex, Flow, LWC, and Salesforce declarative automation

Authentic enthusiasm for AI-driven development, including hands-on experimentation with tools such as Copilot, Agentforce, Einstein, or LLM-assisted coding workflows, and a proven track record of using these tools

Working familiarity with Quote-to-Cash processes and subscription-based revenue models (Billing experience preferred but not required)

Strong problem-solving skills and keen attention to detail

Ability to work independently while collaborating effectively within a team

Preferred

Salesforce certifications are preferred (Platform Developer I & II)

Experience with modern billing or monetization platforms is a plus—such as Orb, Metronome, Chargebee, or similar usage-based billing systems

1+ year of Python experience is a plus

Benefits

Depending on role eligibility, Wasabi team members may also receive additional compensation and benefits, including bonus or variable compensation, equity, and a comprehensive benefits package designed to support both professional growth and personal well-being.
