Cover letter

Wasabi Technologies - Senior Business Systems Engineer (Salesforce & Billing Platform)

Job URL

Dear Hiring Manager,

I am excited to apply for the Senior Business Systems Engineer role at Wasabi Technologies. With over 7 years of hands-on experience designing and developing scalable Salesforce solutions, I bring a strong technical foundation in Apex, Lightning Web Components, Salesforce Flow, and declarative automation critical to advancing Wasabi's AI-driven platform goals.

At Docker and Amazon Web Services, I successfully integrated AI-assisted tools including Einstein and Agentforce to automate complex case triage and customer workflows, achieving measurable improvements in case resolution rates and automation reliability. I also led initiatives modernizing CI/CD pipelines with automated testing and AI-assisted code reviews, reducing deployment times and improving release quality.

My experience supporting Quote-to-Cash processes and subscription-based billing systems aligns tightly with Wasabi’s need to optimize billing and monetization workflows. I have delivered secure, API-driven Salesforce integrations with external billing platforms and collaborated closely with finance and product teams to refine invoicing and revenue recognition processes.

I am confident that my technical proficiency and proactive approach to AI-enhanced Salesforce engineering will contribute to Wasabi’s mission to deliver disruptive, high-performance cloud storage solutions. I look forward to the opportunity to bring my skills and collaboration mindset to your team.

Thank you for considering my application.

Sincerely,
Triet Le
