ARK Solutions, Inc. - Senior Software Engineer, Salesforce Platform :: Bethesda, MD (Remote)

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Senior Salesforce Platform Engineer position at ARK Solutions, Inc. With over seven years of specialized experience in Salesforce development, architecture, and integration, I have a proven record of delivering scalable, secure, and high-quality solutions aligned with enterprise requirements.

At Docker, I led complex Salesforce architecture initiatives, developing secure and performant platform solutions using Apex, Lightning Web Components, and OmniStudio. I designed robust REST API integrations and implemented Salesforce Shield monitoring strategies to enhance platform security and compliance, directly addressing key challenges your job description emphasizes.

My role at AWS further refined my skills in enterprise-scale Salesforce development and integration, where I enhanced user experience through LWC and Aura Components, automated off-platform processes using Python, and strengthened DevOps pipelines with GitHub and Harness. These experiences directly map to your requirements for strong Salesforce development, security monitoring, and integration expertise.

I am confident that my technical proficiency, leadership in code quality and mentorship, and deep understanding of Salesforce platform capabilities—including emerging AI integrations like Agentforce—position me well to excel in this role. I look forward to the opportunity to contribute to ARK Solutions' ongoing success.

Thank you for your consideration.

Sincerely,
Triet Le
