Cover letter

Lasso Informatics - Salesforce Developer

Job URL

Dear Hiring Manager,

With over 7 years of hands-on experience as a Salesforce Developer in complex, regulated environments, I am well-positioned to contribute to Lasso Informatics' mission to empower scientific data management. My extensive expertise in Apex programming, Lightning Web Components, Salesforce Flows, and secure REST API integrations addresses your critical need for reliable and scalable Salesforce solutions.

At Docker and AWS, I engineered and maintained Salesforce platforms processing over 250,000 records monthly and integrated sophisticated API and event-driven patterns that improved operational efficiency by up to 30%. I led a modern declarative automation overhaul with flows replacing legacy workflows, boosting maintainability and reducing issue latency by over 40%. Additionally, I have successfully implemented AI-driven development tools like Claude to enhance code quality and accelerate troubleshooting.

My background working alongside administrators, QA engineers, and analysts in agile teams aligns seamlessly with your collaborative environment. I bring a proven ability to translate business requirements into architected, governor-limit-conscious solutions while ensuring high code coverage and security compliance. I am eager to bring this blend of technical excellence and solution-focused thinking to elevate your Salesforce platform.

Thank you for considering my application.

Sincerely,
Triet Le
