No H1B

Responsibilities

Administer and configure Salesforce Sales Cloud and Financial Services Cloud environments

Maintain and optimize profiles, permission sets, territory management, role hierarchies, sharing rules, and field-level security

Configure Salesforce solutions to meet business requirements

Manage Single Sign-On (SSO) integrations through Azure Active Directory

Implement and monitor Salesforce Shield encryption, audit logging, and security controls to protect organizational data

Configure and oversee Salesforce backup and recovery processes using Salesforce Backup (Own Backup) or similar tools

Create and maintain sandboxes and scratch orgs while ensuring appropriate data masking and obfuscation practices

Partner with Enterprise Security and Infrastructure Engineering teams to establish and maintain Salesforce security baselines

Support compliance with SOC 1, SOC 2, and other regulatory requirements through collaboration with Compliance and Internal Audit teams

Monitor Salesforce releases and critical updates, perform regression testing, and coordinate release readiness activities

Provide day-to-day Salesforce user support, troubleshoot issues, and coordinate escalations with Salesforce Support as needed

Maintain platform documentation, procedures, and administrative standards

Participate as an active member of the Salesforce Scrum Team, contributing to sprint planning, backlog refinement, testing, and release activities

Communicate project status, technical issues, and impediments to stakeholders and team members

Perform other duties as assigned
