MissionSquare - Expert Salesforce Administrator

Job URL

Dear Hiring Manager,

I am excited to offer my expertise as an Expert Salesforce Administrator to MissionSquare, bringing over 7 years of hands-on experience administering complex multi-org Salesforce environments centered around Sales Cloud and Financial Services Cloud. In my current role at Docker, I lead security and administration efforts, managing permission models, Salesforce Shield encryption, and sandbox environments aligned with strict compliance mandates such as SOC 1 and SOC 2. I have successfully reduced security incidents by 15% through effective access management and enhanced recovery readiness by ensuring robust backup and recovery processes.

My background includes strong collaboration with Enterprise Security and Compliance teams, ensuring platform security baselines meet organizational and regulatory standards. I have also implemented Azure AD Single Sign-On and led Salesforce AI initiatives using Agentforce, directly aligning with MissionSquare's goals for security, scalability, and innovation.

With proven success leading Salesforce release readiness and optimizing user support, I confidently bring the technical acumen, leadership, and security-first perspective critical for MissionSquare's Salesforce environment. I welcome the opportunity to further discuss how my background will support your team's objectives.
