Cover letter

PingWind - Senior Salesforce Developer

Job URL

Dear Hiring Manager,

I am eager to contribute as a Senior Salesforce Developer supporting the Veterans Benefits Administration Solutions Delivery Center of Excellence. With over 7 years of hands-on experience architecting scalable Salesforce Sales Cloud and Service Cloud solutions, I bring a profound depth of expertise in Apex, Lightning Web Components, and MuleSoft integrations—skills directly aligned with your requirements.

At Docker Inc and AWS, I led development of Salesforce OmniStudio applications and Agentforce implementations to enhance customer and service workflows while ensuring Salesforce platform governance and security best practices. I engineered API-driven integrations using MuleSoft and REST/SOAP APIs, improving data resilience and synchronization across multiple systems. Notably, my development of bulk-safe Apex processes has reduced automation failures by 20%, directly enhancing operational reliability.

My technical leadership in Agile environments, coupled with a strong focus on secure, compliant Salesforce architectures, equips me to navigate the complexity of federal programs like the one you support. I am confident my background in integrating Salesforce with middleware, crafting robust API solutions, and optimizing user access models will deliver measurable value to your team.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can help drive the success of your Salesforce initiatives.
