Cover letter

Zachary Piper Solutions - REMOTE - Senior Salesforce Developer - 174397

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Senior Salesforce Developer position supporting your federal healthcare program. With over 7 years of Salesforce experience and proven expertise in leading complex implementations, I am confident in delivering robust, scalable Salesforce solutions tailored for healthcare and enterprise needs.

At Docker and AWS, I architected and developed custom Apex and Lightning Web Components while expertly managing Salesforce security, integrations, and asynchronous processing at scale. My experience includes delivering OmniStudio guided workflows, optimizing automation to reduce failures by 20%, and building Experience Cloud portals that increased user engagement and reduced case volume by up to 20%.

I hold both Salesforce Platform Developer I and II certifications and possess strong proficiency in Apex, Batch Triggers, LWC, Aura Components, SOQL, SOSL, and Salesforce Lightning Design System—technologies central to this role. I also continuously apply best practices in secure development, governor limits, and Agile delivery.

My ability to mentor teams and improve code quality aligns well with your need for technical leadership. I am eager to contribute to your federal healthcare initiatives by building maintainable, compliant, and high-performing Salesforce solutions.

Thank you for your consideration.

Sincerely,
Triet Le
