Cover letter

Avalara - Salesforce DevOps Release Engineer

Job URL

Dear Hiring Manager,

I am excited to apply for the Salesforce DevOps Release Engineer position at Avalara. With over 7 years of Salesforce experience and specialized expertise in release management, I have led multiple successful deployments that mirror the critical needs outlined in your job description.

During my tenure at AWS and Docker, I've consistently developed scalable CI/CD solutions that focus on automation and efficiency. My background in creating governed, automated pipelines aligns with Avalara’s pursuit of reducing operational risk through modern DevOps practices. I have embraced AI and automation tools to not only improve deployment reliability but also enhance developer productivity, actively engaging in projects that leverage GitHub Copilot and intelligent testing frameworks.

In addition, my leadership in building approval gates and compliance processes ensures every deployment adheres to regulatory and organizational requirements. By integrating Terraform with AWS infrastructure provisioning, I’ve optimized resource management across interconnected systems such as Boomi and Salesforce, ensuring seamless operations and minimizing disruption.

I am particularly drawn to Avalara's AI-first culture and am eager to bring my skills in AI-powered DevOps capabilities to your team. Thank you for considering my application. I look forward to the possibility of contributing to Avalara’s innovative solutions and achieving excellence in release engineering.

Sincerely,

Triet Le
