Job description

BTL Industries - Salesforce & Commercial Systems Administrator

Job URL

Salesforce & Commercial Systems Administrator

BTL Industries uses Salesforce as its central commercial platform for customer data, sales processes, marketing programs, reporting, and growth. The Salesforce and Commercial Systems Administrator will administer Salesforce Sales Cloud and connected commercial systems, maintain data quality, support users, and implement approved configurations, automation, reports, and enhancements.

IndustrialManufacturingMedical Device

Responsibilities

Administer Salesforce Sales Cloud, including users, permissions, security, objects, fields, page layouts, record types, Lightning applications, Flows, and validation rules

Identify, recommend and execute system and process improvements; test, document, and implement approved changes under established priorities and requirements

Support system updates associated with new products, teams, territories, reporting structures, and commercial initiatives

Maintain data quality across Accounts, Contacts, Leads, Opportunities, and custom objects through imports, updates, deduplication, cleanup, and ongoing controls

Build and maintain reports and dashboards supporting pipeline visibility, sales performance, account coverage, campaign activity, and operational reporting

Support selected connected systems, including Account Engagement, ZoomInfo, customer-support platforms, Digital Asset Management tools, event platforms, and ERP integrations

Troubleshoot system, data, reporting, and integration issues; test and document changes; and coordinate with internal teams, vendors, and consultants when needed

Provide responsive user support, maintain documentation and training materials, and partner with Salesforce administrators and teams across Sales, Marketing, Product Management, IT, and Service

Manage assigned priorities independently, communicate progress and blockers proactively, and follow requests through resolution
