Job description

CALSTART - Contract Salesforce Developer/Admin

Job URL

Contract Salesforce Developer/Admin

CALSTART, now Catalyst Mobility, is a mission-driven industry organization focused on transportation decarbonization and clean air. The Contract Salesforce Developer/Admin will support the centralization of two Salesforce environments by leading data migration and configuring and developing Membership Services and Business Development workflows in Salesforce Nonprofit Cloud.

Responsibilities

Help lead a major Salesforce centralization initiative, bringing Forth's existing Salesforce data and processes into CALSTART's Salesforce Nonprofit Cloud environment and helping establish a strong foundation for future organizational growth

Plan and execute the Salesforce-to-Salesforce data migration, including data mapping, cleansing, validation, migration execution, and reconciliation to ensure critical organizational and historical data is transitioned accurately

Configure and develop Membership Services and Business Development workflows, using Salesforce automation, objects, permissions, reporting, and custom development where needed to create scalable, intuitive solutions for our teams

Partner closely with business stakeholders and CALSTART's Platform/Technology team to understand current processes, identify opportunities for improvement, and translate requirements into practical Salesforce solutions

Support testing, deployment, documentation, and stabilization of the new centralized environment, helping ensure the solution is secure, maintainable, well-documented, and ready for long-term organizational use

Required

A builder's mindset with a designer's perspective — someone who can take a business need, think through the best solution, and then roll up their sleeves and build it

Ownership and curiosity, with the ability to take on a significant project, ask the right questions, identify gaps, and help drive the work forward rather than waiting for detailed instructions

Creative problem-solving balanced with Salesforce best practices, helping us build solutions that meet today's needs without creating unnecessary complexity or technical debt

Strong partnership and communication skills, with the ability to work directly with business stakeholders, understand how teams operate, and translate those needs into thoughtful Salesforce solutions

A consultative approach, bringing recommendations and lessons learned to the table and helping CALSTART make informed decisions about configuration, data structure, automation, migration, and long-term platform design

Hands-on experience with Salesforce Nonprofit Cloud, including designing and configuring solutions for nonprofit business processes. Nonprofit Cloud experience is a key qualification for this role; experience limited primarily to Sales Cloud will not be sufficient

Demonstrated experience working across both Salesforce administration and development, including Flow, automation, data modeling, permissions/security, reporting, integrations, and custom development where appropriate

Experience planning and executing Salesforce-to-Salesforce migrations, including data mapping, transformation, cleansing, migration, validation, and reconciliation

Preferred

Experience designing Salesforce solutions for areas such as membership, fundraising/philanthropy, constituent or relationship management, and business development

Salesforce certifications such as Salesforce Administrator, Platform App Builder, Platform Developer, or relevant Nonprofit Cloud credentials

demonstrated knowledge of Salesforce architecture and implementation best practices
