Job description

Cherokee Federal - Salesforce Consultant

Job URL

Salesforce Consultant

Cherokee Federal is seeking a Salesforce Consultant to support a Department of War government environment. The role partners with government product and program leads to modernize and optimize Salesforce capabilities through configuration, OmniStudio and programmatic development, requirements leadership, testing, deployment, and stakeholder briefings.

GovernmentNon ProfitProfessional ServicesMarketingPublic Relations

No H1BU.S. Citizen Only

Responsibilities

Design and maintain Salesforce org configuration including objects, fields, page layouts, record types, validation rules, and permission sets

Build and optimize automation using Flows, and maintain legacy Process Builder/Workflow rules

Configure and optimize Salesforce using declarative tools, with emphasis on Flow (record-triggered, screen flows, scheduled flows), approvals, validation rules, page layouts, and Lightning App Builder to reduce manual work and improve operational efficiency

Ensure declarative automation is scalable, maintainable, and aligned with governance, auditability, and compliance expectations in a regulated environment

Present formal and informal oral and written briefings to government managers; produce executive-ready summaries and decision support materials

Manage security model including profiles, roles, sharing rules, and permission set groups

Perform other job-related duties as assigned

Build and configure OmniStudio components: FlexCards, OmniScripts, DataRaptors (Extract/Transform/Load/Turbo), and Integration Procedures

Design guided user experiences and data-driven interfaces using OmniStudio declarative tooling

Optimize Integration Procedures and DataRaptors for performance, including bulk/cacheable configurations

Troubleshoot and debug OmniStudio components across environments

Develop and maintain Apex classes, triggers, and asynchronous processes (Batch, Queueable, Scheduled)

Build Lightning Web Components (LWC) and integrate them with OmniStudio components where declarative tooling falls short

Write and consume REST/SOAP integrations and callouts to external systems

Author Apex unit tests meeting code coverage and quality standards

Participate in the full SDLC: requirements gathering, design, build, testing, and deployment

Use source control (Git) and CI/CD tooling (e.g., SFDX, Gearset, Copado) for deployments

Translate business requirements into scalable solutions, choosing appropriately between declarative and programmatic approaches

Document technical designs, data flows, and configuration decisions

Perform other job-related duties as assigned

Required

As required by our governmental client, this position requires U.S. Citizenship

* Salesforce Administrator and Platform Developer I certifications (OmniStudio Developer/Consultant a plus)

* Hands-on experience with both point-and-click configuration and Apex/LWC development

* Demonstrated OmniStudio implementation experience

* Bachelor's degree with preferred study in Computer Science, Information Science, Information Systems Management, Math, Statistics, Operations Research, or Engineering and a minimum of five (5) years of experience

Eight (8) years of work experience in related field may be substituted for education

* Demonstrated experience leading requirements in an Agile delivery environment, including story mapping, user story writing, and acceptance criteria development

* Proven ability to translate complex business processes into clear requirements and actionable user stories

* Experience documenting business rules and processes using workflow diagrams and structured artifacts (e.g., CONOPS)

* Hands-on experience with declarative configuration and automation, including Salesforce Flow

* Strong written and verbal communication skills; ability to brief senior government stakeholders

* U.S. Citizenship is required
