Job description

Ford Pro - Salesforce Engineer

Job URL

Salesforce Engineer

Ford Motor Credit Company provides financing, personalized service, and professional expertise to Ford and Lincoln dealerships and customers worldwide. The Senior Salesforce Engineer will design, develop, customize, and support secure, scalable Salesforce solutions on the Force.com platform, including integrations, applications, workflows, and automated testing. The role also provides architectural leadership, mentors engineers, and collaborates with business and technology stakeholders.

AutomotiveLogisticsSoftwareFleet Management

No H1B

Responsibilities

Work in a fast-paced environment with business, technology, and designers to build new capabilities, platforms, features and improving existing capabilities

Responsible for customizing, developing, and supporting solutions on the force.com platform

Drive Salesforce enhancements and improvements

Build integrations between salesforce and other internal systems to automate business processes

Develop Apex (classes and triggers) and Java Script, Lightning Components, Lightning Web Components, Visualforce, Flows, Omni Script and Flex Cards to extend Salesforce

Verify solutions by writing and executing automated test classes

Collaborate, mentor and guide other engineers within the team

Well-developed interpersonal, written, and verbal communication skills including the ability to negotiate, advise, influence others, and work collaboratively

Document and analyze processes, procedures, and ensure code is properly documented

Create and maintain a code repository to ensure a seamless deployment process for all team members

Stay current on the latest trends and Salesforce releases

Self-directed, can solve business problems from inception to implementation, can solve business problems without explicit direction

Provide leadership in the overall Salesforce architecture, application design, and system development

Architect secure, scalable solutions on Salesforce that meet business requirements

Create and deliver CRMs and workflow solutions using Salesforce/Apex, Visualforce, and related technologies

Oversee programming development and testing of interfaces according to specifications

Mentor team members on best practices and new technology needs
