Job description

Litify - Implementation Consultant (Salesforce Certified)

Job URL

Implementation Consultant (Salesforce Certified)

Litify is a legal technology company powering law firms and corporate legal departments with an AI-native platform built on Salesforce. The Implementation Consultant will configure the Litify platform during client implementations, translating requirements into scalable solutions and partnering with project teams to design, test, deploy, and demonstrate Salesforce solutions.

Responsibilities

Own the Technical Build: Translate client requirements into scalable solutions while following Litify and Salesforce best practices

Support Client Engagements: Collaborate with Project Managers and Solution Architects on client calls, participating in discovery and technical discussions without having to lead every meeting

Execute Full Build Cycles: Partner within cross-functional project teams to design, configure, test, and deploy declarative Salesforce solutions and platform extensions

Present Technical Solutions: Demo completed builds to internal team members and client stakeholders to validate that solutions meet business requirements

Continuously Improve: Document discovery findings, identify configuration best practices, and share knowledge across the broader Services team to elevate delivery quality

Required

1–5 years of hands-on experience as a Salesforce Administrator or Consultant

Advanced proficiency with Salesforce Flow (Record-Triggered Flows, loops, collection variables, subflows, and custom UI components)

Proven ability to build custom objects, fields, page layouts, Lightning Web Page assignments, dynamic forms, and record types

Hands-on experience migrating, cleansing, and mapping complex relational data using tools like Apex Data Loader

Deep knowledge of profiles, permission sets, permission set groups, roles, and sharing rules

Comfortable leading client-facing technical demos, gathering requirements, and collaborating with Project Managers in an Agile environment

Proven ability to manage competing priorities, balance build deliverables across 2–4 simultaneous projects, and maintain comprehensive documentation, including system configurations and detailed test steps

Preferred

Exposure to the legal industry and technology in law firms

Salesforce certifications such as ADM-201 or DEV-401

A bachelor's degree from an accredited university

Benefits
