Job description

PSI (Proteam Solutions) - Sr. Software Engineer

Job URL

Sr. Software Engineer

PSI (Proteam Solutions) is hiring a Senior Software Engineer to lead the design, development, deployment, and technical governance of complex Salesforce solutions. The role focuses on Salesforce configuration and customization, enterprise integrations, architecture, technical planning, production issue resolution, and stakeholder communication.

Enterprise SoftwareInformation TechnologyCRM

Responsibilities

Lead end-to-end design, development, and deployment of complex Salesforce solutions (Service Cloud, Community/Experience Cloud)

Define and govern technical architecture decisions, ensuring alignment with Salesforce best practices, Apex design parameters, governor limits, and shared platform standards

Perform and oversee technical configuration, customization, and development using Apex, Lightning (LWC), HTML/CSS, and JavaScript

Architect and maintain integrations between Salesforce and enterprise systems using REST APIs, Boomi, SSO, and Identity & Access Management solutions

Translate complex business requirements into well-architected, scalable technical solutions that maximize the value of the Salesforce platform

Lead technical planning, estimation, and sprint execution in collaboration with QA, DevOps, and release teams to ensure high-quality, timely deployments

Drive troubleshooting and resolution of complex production issues, performance bottlenecks, and integration failures

Support salesforce automation, customer relationship management, and support/help desk solution delivery

Act as a key point of contact and subject matter expert for Salesforce platform questions across the organization

Communicate effectively with technical and non-technical stakeholders at all levels through clear verbal and written communication
